## Section 1 | Economic Update

## Economic Update

- The second quarter was likely the low point for economic activity and the consensus forecast calls for a fairly strong rebound in activity in the current quarter and a slowing pace in improvement thereafter. However, the outlook remains uncertain, particularly amid ongoing US COVID-19 outbreaks. We believe the outlook for economic activity is dependent on the course of the pandemic, the amount of additional fiscal relief from the government, and the timeline for a vaccine. Notably, the effects of the pandemic continue to weigh heavily on the labor market. Year-to-date, the S\&P 500 index is up modestly as the US equity market has largely recovered its pandemic-fueled decline and the worst of the economic data appears to be in the rearview mirror.
- As expected, the Federal Open Market Committee kept the fed funds target rate unchanged at their July meeting in a range of $0.0 \%$ to $0.25 \%$. The Fed extended its emergency lending programs through the end of 2020, a three-month extension, and will continue to use its balance sheet to support the flow of credit and stability of financial markets. Fed Chair Powell indicated that the Fed is more cautious about the downside risks to the economy and less concerned about the upside and potential threat of inflation. In his words, the Fed's job is to "hope for the best and plan for the worst." In our view, this suggests that policy rates are likely to remain low until employment is clearly back on track.

■ The Treasury yield curve flattened in July, with short-term rates anchored near $0.0 \%$ and the yield on 10-year Treasuries down 13 basis points. On a year-to-date basis, the yield on 2 -year Treasuries was down 146 basis points to $0.11 \%$ and the yield on 10-year Treasuries was down about 139 basis points to $0.53 \%$ at the end of July. In August, the Treasury yield curve has steepened, driven by an increase in longer-term rates. We believe a wave of new Treasury issuance to fund the growing fiscal deficit has put upward pressure on longer-term rates this month. Inflation expectations have also started to creep higher. Nevertheless, Treasury yields remain very low on a historical basis.

## Employment

Source: US Department of Labor

Unemployment Rate

Source: US Department of Labor
U.S. nonfarm payrolls were better than expected, increasing by $1,763,000$ in July versus expectations of $1,480,000$. Private payrolls increased by $1,462,000$ and government payrolls increased by 301,000 . The unemployment rate declined to $10.2 \%$ in July (versus expectations of $10.6 \%$ ) from $11.1 \%$ in June. However, the participation rate edged down to $61.4 \%$ from $61.5 \%$. Furthermore, workers who classified themselves as employed but absent from work in the July survey understated the unemployment rate by about $1 \%$. The U- 6 underemployment rate, which includes those who are marginally attached to the labor force and employed part time for economic reasons, remained very high but eased to $16.5 \%$ in July from $18.0 \%$ in June.

## Initial Claims for Unemployment

Source: US Department of Labor

In the most recent week, initial jobless claims increased by 1,106,000, which was higher than the prior week level of 971,000 . The level of continuing unemployment claims (where the data is lagged by one week) remained very high in the week of August 7th at about 14.8 million but was down from the prior week level of nearly 15.5 million. Although continuing jobless claims have declined from the peak of nearly 25 million in early May, they remain well above the 2019 average of 1.7 million.

## CARES Act and Other Fiscal Stimulus: \$2.7 Trillion and Counting

## Inflation

The Consumer Price Index (CPI) was up $1.0 \%$ year-over-year in July, versus up $0.6 \%$ in June. Core CPI (CPI less food and energy) was up $1.6 \%$ year-over-year in July, versus up $1.2 \%$ in June. The Personal Consumption Expenditures (PCE) index was up $0.8 \%$ year-over-year in June, versus up just $0.5 \%$ year-over-year in May. Core PCE, which is the Fed's primary inflation gauge, was up $0.9 \%$ year-over-year in June, versus up $1.0 \%$ year-over-year in May. Both CPI and PCE are running meaningfully lower than pre-pandemic levels, indicating that the effect of the pandemic has been deflationary.

## Consumer

Retail sales were softer than expected in July. Nevertheless, on a year-over-year basis, retail sales were up $2.7 \%$ in July, an improvement from $2.1 \%$ in June. On a month-over-month basis, retail sales were up just $1.2 \%$ in July, following an $8.4 \%$ increase in June. Excluding autos and gas, retail sales were up $1.5 \%$ in July, which was better than expected. Spending at electronics and appliance stores jumped nearly $23 \%$ in July. Spending on clothing, restaurants, health \& personal care, and online retail also increased in July. The Consumer Confidence index fell to 92.6 in July from 98.3 in June. There were large declines in California, Florida and Texas where virus cases were increasing rapidly.

## Economic Activity

Chicago Fed National Activity Index (CFNAI)

Source: Federal Reserve Bank of Chicago

The Conference Board's Leading Economic Index (LEI) rose 1.4\% in July, following a 3.0\% increase in June. On a year-over-year basis, the LEI was down $6.8 \%$ in July versus down $7.7 \%$ in June. According to the Conference Board, the post-pandemic recovery appears to be "losing steam" and the pace of economic growth is likely to weaken through year-end. The Chicago Fed National Activity Index (CFNAI) declined to 1.18 in July from 5.33 in June. However, on a 3-month moving average basis, the CFNAI improved to +3.59 in July from -2.78 in June, which is above the -0.7 recessionary level for the first time since February.

## Housing

Total housing starts surged nearly $23 \%$ in July to an annual pace of $1,496,000$. Single family starts rose $8.2 \%$ to an annualized rate of 940,000 , while multi-family starts soared $58.4 \%$ to an annualized rate of 556,000 . On a year-over-year basis, housing starts were up $23.4 \%$ in July, with single family starts up $7.4 \%$ year-over-year, and multi-family starts up $65.0 \%$. Meanwhile, permits were up $18.8 \%$ in July on a month-overmonth basis, to an annualized rate of $1,495,000$. According to the Case-Shiller 20-City home price index, home prices were up $3.7 \%$ year-overyear in May versus up 3.9\% year-over-year in April. Home prices have been generally resilient despite the weak economic backdrop and we believe low inventory and low mortgage rates continue to support prices.

## Manufacturing

The Institute for Supply Management (ISM) manufacturing index improved to 54.2 in July from 52.6 in June. New orders rose five points to 61.5 . The reading above 50.0 suggests that the manufacturing sector is expanding. The Industrial Production index was down $8.2 \%$ year-over-year in July, versus down $11.0 \%$ in June. On a month-over-month basis, the Industrial Production index increased $3.0 \%$ in July, following a $5.7 \%$ increase in June. Capacity Utilization improved to $70.6 \%$ in July from $68.5 \%$ in June, but remains well below the long-run average of $79.8 \%$. Overall manufacturing conditions have improved, following a deep contraction.

Gross Domestic Product (GDP)

Source: US Department of Commerce

US gross domestic product (GDP) declined at an annual rate of $32.9 \%$ in the second quarter, just slightly less negative than the consensus forecast of $-35.0 \%$ but the largest decline on record. This follows a $5.0 \%$ annualized decline in first quarter GDP. Personal consumption expenditures plunged $34.6 \%$ in the second quarter, following a $6.9 \%$ decline in the first quarter. The consensus forecast calls for a fairly strong rebound in consumer spending and overall economic activity in the third quarter, and a slowing pace of improvement in activity thereafter. According to the National Bureau of Economic Research, the US economy officially entered a recession in February 2020, following a 128-month economic expansion. Economic data remains weak but is showing early signs of improvement, which suggests that the recession (which is the period between the peak of economic activity and the trough) may technically already be over.

## Federal Reserve

The Fed has taken a wide range of aggressive actions to help stabilize and provide liquidity to the financial markets. The Fed has lowered the fed funds target rate to a range of $0.0 \%-0.25 \%$ and continues to purchase Treasury and agency mortgage-backed securities to support smooth market functioning. Policymakers reinstated the Commercial Paper Funding Facility and Money Market Mutual Fund Liquidity Facility in order to provide liquidity to the commercial paper, money markets, and the municipal bond markets. The Fed has established the Primary Market Corporate Credit Facility and Secondary Market Corporate Credit Facility to support the corporate bond market. The Term Asset-Backed Securities Loan Facility has been established to enable the issuance of asset-backed securities backed by student loans, auto loans, credit card loans, and loans guaranteed by the Small Business Administration. The Fed has established the Paycheck Protection Program Liquidity Facility and Fed's Main Street Lending Facility to support the flow of credit to businesses. The Fed established the Municipal Liquidity Facility to purchase short-term debt directly from US states, counties, and cities. The Fed has also provided short-term funding through large-scale repo operations and lowered the reserve requirement for depository institutions.

## Bond Yields

At July month-end, Treasury yields were much lower on a year-over-year basis. The 3-month T-bill yield was down 198 basis points, the 2-year Treasury yield was down 177 basis points, and the 10-Year Treasury yield was down 149 basis points, year-over-year. Much of the spread movement was in the month of March 2020, with the Fed cutting rates by a total of 150 basis points and concerns about a global recession and a flight to safe-haven assets driving down yields across the curve.

## Section 2 | Account Profile

## Investment Objectives

The investment objectives of the District, in order of priority, are to provide safety to ensure the preservation of capital in the overall portfolio, provide sufficient liquidity for cash needs and a market rate of return consistent with the investment program.

## Chandler Asset Management Performance Objective

The performance objective for the portfolio is to earn a total rate of return through a market cycle that is equal to or above the return on the benchmark index.

## Strategy

In order to achieve these objectives, the portfolio invests in high quality fixed income securities consistent with the investment policy and California Government Code.

## Three Valleys Municipal Water District

Assets managed by Chandler Asset Management are in full compliance with state law and with the District's investment policy.

Information contained herein is confidential. Prices are provided by IDC, an independent pricing source. In the event IDC does not provide a price or if the price provided is not reflective of fair market value, Chandler will obtain pricing from an alternative approved third party pricing source in accordance with our written valuation policy and procedures. Our valuation procedures are also disclosed in Item 5 of our Form ADV Part 2A.

Performance results are presented gross-of-advisory fees and represent the client's Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. It is not possible to invest directly in an index.

Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody's, S\&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.
Security level ratings for U.S. Agency issued mortgage-backed securities ("MBS") reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest and carries a AA+/Aaa/AAA by S\&P, Moody's and Fitch respectively.

## Benchmark Disclosures

## ICE BAML 1-5 Year US Treasury/Agency Index

The ICE BAML 1-5 Year US Treasury \& Agency Index tracks the performance of US dollar denominated US Treasury and nonsubordinated US agency debt issued in the US domestic market. Qualifying securities must have an investment grade rating (based on an average of Moody's, S\&P and Fitch). Qualifying securities must have at least one year remaining term to final maturity and less than five years remaining term to final maturity, at least 18 months to maturity at time of issuance, a fixed coupon schedule and a minimum amount outstanding of $\$ 1$ billion for sovereigns and $\$ 250$ million for agencies.
