

MIRAGRAND WELL CONSTRUCTION UPDATE

Project Update: September 2, 2021

Well drilling (phase 1) construction was successfully completed in December 2020. The next phase of construction will be the **well equipping** improvements which consist of site grading, installation of well pump/motor, construction of well building enclosure, electrical, mechanical piping, fencing, rock drainage swale, and landscaping.

TVMWD has contracted with an experienced contractor (Pacific Hydrotech Corporation). The contractor is in the process of procuring materials for construction. It is anticipated that the contractor will **begin construction on September 8, 2021**, and **complete construction in April 2022**.

As discussed during the public outreach meetings conducted at the District, the well equipping **construction activities will occur during normal day working hours (7:00 am to 5:00 pm)**.

Please check the District's website <https://www.threevalleys.com/projects> for periodic project updates.

Miragrand Well Conceptual Rendering

Construction of the Miragrand well will enable TVMWD to enhance the use of reliable, less expensive, local water resources over the long-term in a sustainable manner and reduce the need for imported water. We appreciate your understanding.

If you have any questions please contact the Project Manager, Ben Peralta, at (909) 621-5568.

Sincerely,

Ben Peralta Jr., P.E.
